CareerIQ resume report

Demo Candidate | priya.pdf | 08 Nov 2026

92 / 100

Strong
Final-year CS student with full-stack project and internship experience.

Score breakdown

What's working

- Quantified internship results

From your resume: “cutting average response time by 35%”

What to improve

- No live deployment links
- Projects lack user numbers

From your resume: “Designed JWT authentication and role-based access control”

Recommended fixes, most important first

1. Add live demo links to both projects.
2. Quantify TaskFlow's real-world usage.

Measured checks

- 9 of 11 bullet points include a number or measurable result.
- 10 of 11 bullet points start with a strong action verb.
- 17 recognised technical skills across 5 categories.

Skills detected

Python, JavaScript, TypeScript, React, Node.js, Django, FastAPI, PostgreSQL, MongoDB, Docker, Git, GitHub, GitHub Actions, REST, JWT, Data Structures, Algorithms

How the score works: structure and completeness are measured by rules. Impact, keywords and readability are half rule-based measurement, half AI rating. Every quote shown was checked against your resume text.
